

WRITTEN IN THE STARS

In this interactive workshop, we explore the most romantic collection of objects that the universe has to offer. From stars with diamond cores and heart-shaped galaxies, to mythical heroes and Zeus' many escapades - we tell a story of the heavens which is sure to inform and entertain!

KNOWLEDGE

We use a fusion of Greek mythology and astronomy to explore some of the romantic stories behind some of the famous patterns in the sky!

STRUCTURE

In the first hour, we will deliver a talk and have time for questions. In the second hour we'll wrap up warm and stargaze to see some real gems.

CLOUDY PLAN

If the weather is not in our favour and the stars are not visible, we will use the wonder of technology to show you the sky digitally.

This expert-led workshop is suitable for audiences over 18. Our session leaders all have PhDs in Astronomy and love questions!

We require:

- a screen to project on
- desk space to write
- an outside space for observing

Participants should wrap up warm for the evening cold.

Price: £150.00 + travel costs

BOOK NOW!

To book or discuss your Mission Astro workshop, contact Dr Sarah Crick on sarah@justgoodscience.org

2-hour session.
Group sizes up to 50 adults.
1 prize given per group.

TOP TIP

This works wonderfully as a date night with drinks and nibbles. Our team are not responsible for any arguments between couples in the quiz section of the workshop!
