

KS2 True or False SPACE QUIZ

There are 8 planets in the Solar System.

True

False

1

There are 8 planets in the Solar System.

True

False

2

Day and night are caused by
the Moon blocking the sunlight.

True

False

2

Day and night are caused by
the Moon blocking the sunlight.

True

False

3

The Moon takes one year to orbit the Earth.

True

False

3

The Moon takes one year to orbit the Earth.

True

False

4

The Earth takes one year to orbit the Sun.

True

False

4

The Earth takes one year to orbit the Sun.

True

False

5

We always see the same side of the Moon from the Earth.

True

False

5

We always see the same side
of the Moon from the Earth.

True

False

6

The Sun's light can reach the surface of the entire Earth at exactly the same time.

True

False

6

The Sun's light can reach the surface of the entire Earth at exactly the same time.

True

False

7

Mercury is the closest planet
to the Sun.

True

False

7

Mercury is the closest planet
to the Sun.

True

False

8

Mercury is the closest planet to the Earth.

True

False

8

Mercury is the closest planet to the Earth.

True

False

9

The Earth orbits Jupiter as well as the Sun.

True

False

9

The Earth orbits Jupiter as well as the Sun.

True

False

10

The Earth spins once per day
causing day and night.

True

False

10

The Earth spins once per day
causing day and night.

True

False

11

The Sun orbits the centre of our Galaxy.

True

False

11

The Sun orbits the centre of
our Galaxy.

True

False

12

The Moon is always visible
in the sky at night time.

True

False

12

The Moon is always visible
in the sky at night time.

True

False

13

If you looked at the Moon from Australia instead of the UK, it would look like it's upside down.

True

False

13

If you looked at the Moon from Australia instead of the UK, it would look like it's upside down.

True

False

14

Jupiter is the largest planet
in the Solar System.

True

False

14

Jupiter is the largest planet
in the Solar System.

True

False

15

Gravity is the force keeping the Moon in orbit around the Earth.

True

False

15

Gravity is the force keeping the Moon in orbit around the Earth.

True

False
